+ Carestead GEN AI ACADEMY · TEAM PROJECT

ONE CAREGIVER. TOO MUCH TO
REMEMBER.

Everyone has part of the story. Maya holds it *all together.*

 Carestead THE PROBLEM · MEET MAYA

She coordinates Alex's care
around work and family—
remembering every change
and resolving schedule
conflicts again and again.

Illustrative persona and scenario

Care happens across
people.
The mental checklist stays
with one.

Carestead THE PRODUCT AT A GLANCE

One shared place for the work around care.

Care recipient & profile

Personal context, preferences, access notes, and contacts. Breaks, outings, respite, and reviewed coverage plans.

Calendar scheduling

Events, conflicts, and approved

Voice interaction

Google Calendar changes. Speech input and spoken replies;

Notifications

Multichannel

In-app · Email · SMS · Browser push · ntfy

External channels

Care plan & templates

Versioned plans, personal overrides, and safe reuse.

Care Handover

Current context, unresolved risks, and the next responsibilities

Activity logs

Changes, approvals, actions, and outcomes in sequence.

Risk checks & approvals

Explainable checks with review before

Authentication & privacy

Accounts, roles, consent, retention, export, and deletion.

Care Circle

Family, caregivers, and viewers with recipient-specific roles.

Responsibilities

Owners, due dates, assignment, completion, and verification.

Ask Carestead chat

Grounded answers, visible evidence, and action

Memory & integrations

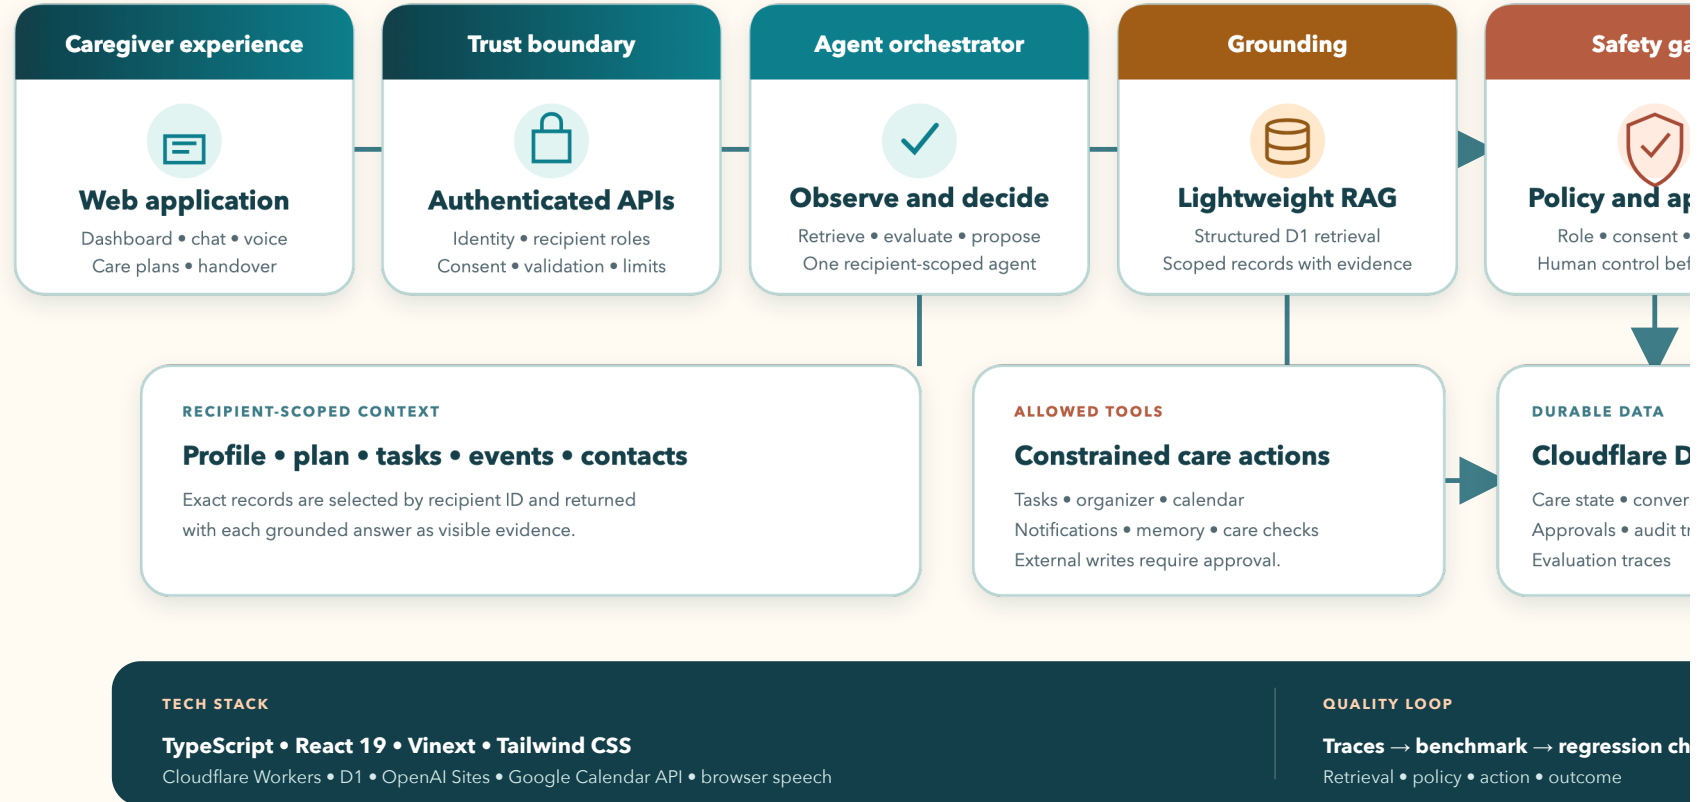

Source-linked D1 facts; connected services and

Evaluation & audit

Trace evidence, decisions, tool calls, and outcomes.

Carestead technical architecture

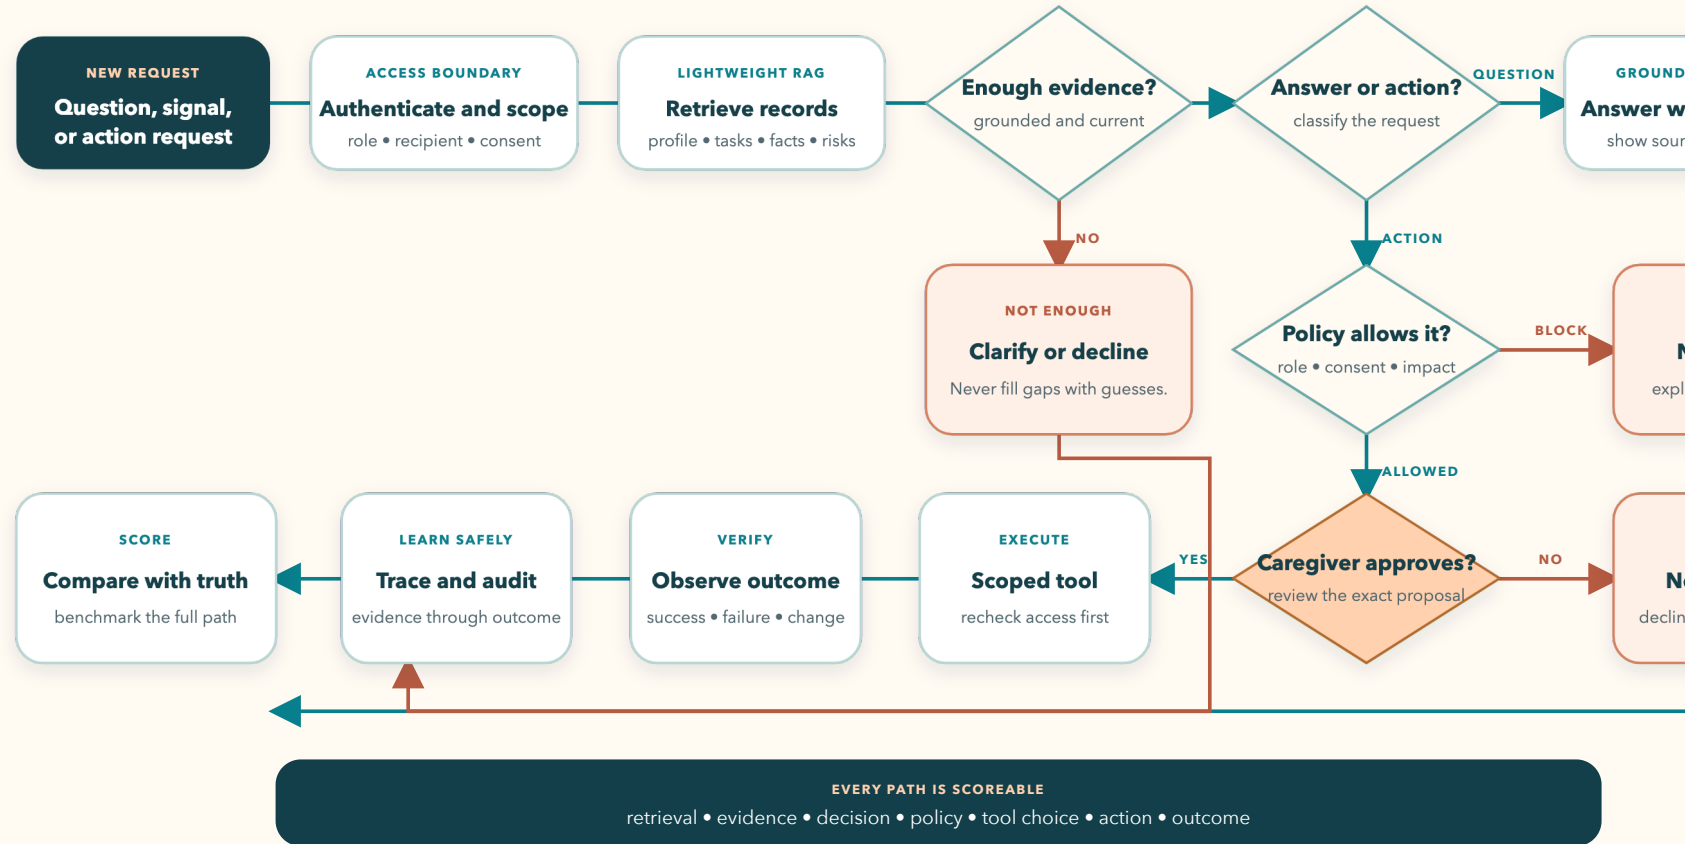

A SIMPLE, GROUNDED, APPROVAL-FIRST SYSTEM

+ Carestead HOW IT WORKS

Carestead decision path

GROUNDING ANSWERS • CONSTRAINED ACTIONS • HUMAN CONTROL

+ Carestead HOW IT WORKS

The agent proposes. Fixed rules and people control the action.

AGENT DECIDES

Relevant records, evidence sufficiency, risk severity and rationale, and a supported next step.

FIXED CONTROLS ENFORCE

Recipient access, consent, allowed tools, validation, approval rules, and integration scope.

CAREGIVER DECIDES

Approve or cancel the exact change; connect services; accept a practical care plan.

Every action is tracked.
WHAT CONTROLS DO
Never diagnose, change doses, judge a care interruption medically safe, or dismiss emergency care.

A
measurable
baseline.
Visible
failures to
improve.

Carestead MEASURE THE DECISION PATH

A shared care picture. A clear next step.

For family caregivers coordinating changing care, Carestead brings the plan, people, and follow-through into one place.

THE VALUE FOR MAYA

Less to remember

Care Plan and trusted context keep the details together.

Responsibility that is shared

Care Circle and Care Organizer make ownership and coverage visible.

More confidence in the next step

Live handover, grounded answers, and reviewed actions explain what happens next.

FUTURE WORK · PROPOSED ROADMAP

Care that travels with you

A dedicated mobile app for quick updates and handovers.

More connected tools

Expand calendar, messaging, and care-service integrations. Explore a Carestead MCP server for scoped interoperability.

Prove the caregiver benefit

Expand evaluations and test with caregivers: coordination effort, completed tasks, and alert burden.

You Care. We Plan.
